

# SAJID UL AHSAN

## SOFTWARE ENGINEER

### About Me

I'm Sajid Ul Ahsan, a builder at heart who loves turning ideas into seamless digital experiences. I find joy in clean code, efficient logic, and user-focused design. Whether it's crafting a powerful backend system or bringing an interface to life, I approach every project with curiosity, precision, and a love for simplicity. I believe great software is not just built – it's thoughtfully shaped to solve problems and make life a little easier.

### Education

- American International University 2012-2016  
Computer Science & Engineering (CGPA 3.21 out of 4)

### Skill

Node JS	<div><div></div></div>
Flutter	<div><div></div></div>
Database	<div><div></div></div>
React	<div><div></div></div>

### Language

Bangla	<div><div></div></div>
English	<div><div></div></div>

### Experience

- Technuf, LLC 2017-Present  
Sr. Software Engineer
  - Led backend API development using Node.js and .NET, ensuring secure and scalable architecture across multiple projects.
  - Developed cross-platform mobile applications with Flutter, enhancing usability and performance.
  - Built responsive web applications using HTML, CSS, and Nuxt.js, delivering seamless UI/UX experiences.
  - Took ownership of database architecture and management, including design, optimization, and performance tuning.
  - Successfully delivered and maintained several high-impact projects, including:
    - Aphelia Student Connect – an educational platform for student-teacher engagement.
    - Health Connect – a healthcare app focused on patient data and doctor interaction.
    - Hajj Connect – a travel coordination tool for Hajj pilgrims.
    - FDC – a financial data coordination system.
- Premier Bank Ltd. 2016-2017  
Jr. IT Officer & Intern
  - Assisted in setting up branch computers and configuring their network connections to ensure smooth operations.
  - Supported network management across bank branches, maintaining connectivity, security, and troubleshooting issues.
  - Gained hands-on experience with IT infrastructure, branch system deployment, and basic network administration.
